

Logs on Mav

Go to Home>Logs. Touch magnifying glass to search

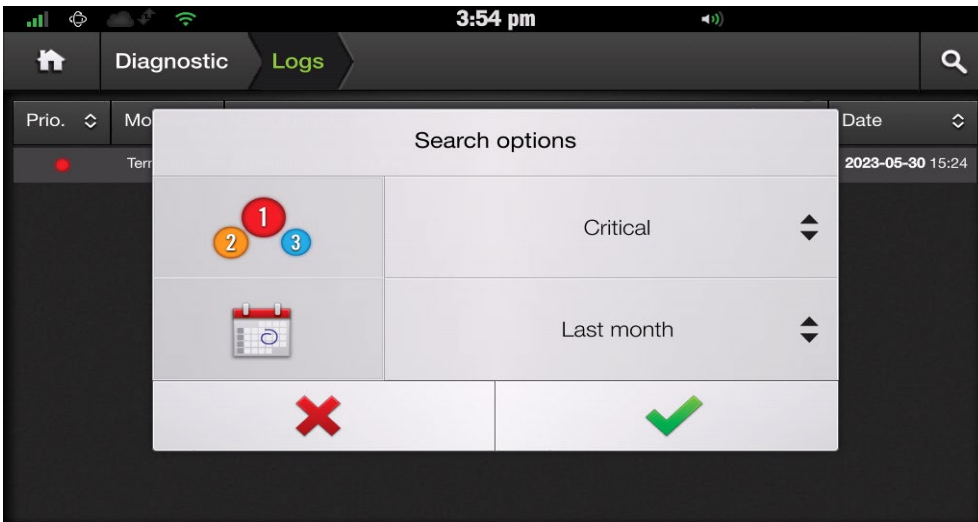

Prio.	Module	Description	Date
	Terminal	Insufficient RAM: 255.84M	2023-06-22 08:48
	Terminal	Unstable GPS signal (invalid coord)	2023-06-19 07:59
	Terminal	GPS Failure (no signal)	2023-06-19 13:56
	Terminal	GPS Failure (no signal)	2023-06-19 14:43
	Terminal	GPS Failure (no signal)	2023-06-20 13:42
	Terminal	Insufficient CPU performance	2023-06-20 16:23
	Terminal	GPS Failure (no signal)	2023-06-21 14:34
	Terminal	Unstable GPS signal (invalid coord)	2023-06-22 08:02
	Terminal	GPS Failure (no signal)	2023-06-22 08:46
	Terminal	GPS Failure (no signal)	2023-06-16 14:55
	Terminal	GPS Failure (no signal)	2023-06-22 09:20

Touch drop-down with All events on it

Choose Critical on the drop-down and hit the green checkmark

Now there is a list of failures in order from worst to better. Please look for the Blue dots as well as it has corrupted map logs and GPS issues as well. Get a screen shot of them and send in to PM.

The screenshot shows the 'Diagnostic Logs' app interface with a list of failures. The table has columns for Priority, Module, Description, and Date. The list shows multiple 'GPS Failure (no signal)' events from the Terminal module, dated from 2023-06-01 to 2023-06-21. Each entry is marked with a blue dot in the Priority column.

Prio.	Module	Description	Date
●	terminal	GPS Failure (no signal)	2023-06-21 14:34
●	Terminal	GPS Failure (no signal)	2023-06-20 13:42
●	Terminal	GPS Failure (no signal)	2023-06-19 14:43
●	Terminal	GPS Failure (no signal)	2023-05-26 09:08
●	Terminal	GPS Failure (no signal)	2023-06-16 14:55
●	Terminal	GPS Failure (no signal)	2023-06-09 15:25
●	Terminal	GPS Failure (no signal)	2023-06-07 15:33
●	Terminal	GPS Failure (no signal)	2023-06-06 15:37
●	Terminal	GPS Failure (no signal)	2023-06-06 14:36
●	Terminal	GPS Failure (no signal)	2023-06-02 15:54
●	Terminal	GPS Failure (no signal)	2023-06-01 15:59

Users should first review the events in logs to determine what minor or major problems terminal has recorded.
