

Installing Outback® S Software Upgrades

Software upgrades are periodically released to enhance, or extend, the performance of your Outback® S. Each software component is released with a version number assigned, for example 2.0. Newer releases are higher numbers and are compatible to older releases. If you are uncertain which version is installed on your unit, go to DIAGNOSTICS in the Outback® S menu. You will find an APPLICATION version and a GPS version. The GPS version effects the way that differential corrections are generated on the receiver. The Application version effects all other functionality of the Outback® S.

Field installation of new Application software, or GPS software, may be performed either from a PC or from an Outback® 360.

Installing Application software with a PC

You'll need:

- Outback® CANLOAD.EXE OUTBACKS??.H86.
- Outback® COM Port Connectivity Kit which contains a standard 9 pin serial cable.
- 12 VDC power supply for the Outback® S if not performing the update in the vehicle.

Perform these steps:

- 1) Remove the antenna cable from the S.
- 2) Connect the PC to the S using the 9 pin serial cable.
- 3) Turn S power on. **DO NOT REMOVE POWER TO UNIT UNTIL AFTER APPLICATION IS COMPLETE**.
- 4) Open CANLOAD.EXE.
- 5) Choose proper COM port where the serial cable is connected. (Usually COM port 1)
- 6) Choose "BIOS" in Program Update Box. Then choose SELECT FILE and open **obsbios.h86**. Then click TRANSFER. (Lights will flash during this process and then the S will reboot. The new S Bios has been installed.)
- 7) Choose "APPLICATION" in Program Update Box. Then choose SELECT FILE and open **out-backs??.h86**. Then click TRANSFER. (Lights will flash during this process then the S will reboot. The new Application version has now been installed.)

Installing Application software with the Outback® 360

You'll need:

 Outback® 360 with Memory Card with Outback Application Software loaded.

Perform these steps:

- Remove the antenna cable from the S.
- Install Power/CAN cables to S and 360 (See owner's manual).
- 3) Install Run/Hold cable to the 360. Then connect the serial connector on that cable to the S. (See owner's manual).
- 4) Turn power on the S and 360. **DO NOT REMOVE POWER TO UNIT UNTIL AFTER APPLICATION IS COMPLETE**.
- 5) On the 360 press MENU then SETUP> SETTINGS>MORE>MORE>MORE.

Then press "LOAD OBK-S BIOS VIA SERIAL PORT".

Then press "LOAD THE BIOS FIRMWARE".

Then press any key to confirm you have the serial cable connected above. (Lights will flash during this process and then the S will reboot. The new S Bios has been installed.)

- 6) Turn 360 power OFF, then while holding the UP and DOWN arrow keys, turn the 360 power ON again.
- Select "LOAD APPLICATION PGM TO OUTBACK S". (Lights will flash during this process and then the S will reboot. The new Application version has now been installed.)

Installing GPS software with a PC

You'll need:

- RIGHTARM.EXE, GPSAppSX2_WAAS_68G.BIN GPSAppSX2_eDiff_26G.BIN
- Outback® COM Port Connectivity Kit which contains a standard 9 pin serial cable.
- 12 VDC power supply for the Outback® S if not performing the update in the vehicle.

Perform these steps:

- 1) Connect the PC to the S using the 9 pin serial cable.
- Make sure S is turned OFF. Leave the S turned OFF until instructed to turn on!
- 3) Open RIGHTARM.EXE.
- 4) Select the CONNECT Icon.
- Choose proper COM port where the serial cable is connected. (Usually COM port 1)

- 6) Set BAUD rate to 19200 and click OK button.
- 7) Select the PROGRAM Icon.
- 8) Select "Application" for Program Type if replacing or updating eDiff. Select "Application 2" for Program Type if replacing or updating WAAS.
- Place a check mark in the boxes next to ACTIVATE LOADER and START APPLICATION AFTER PRO-GRAMMING.
- 10) Press SELECT FILE and select: GPSAppSX2_Waas_68G.bin file for WAAS GPSAppSX2_eDiff_26G.bin file for eDiff Press OPEN.
- 11) Select the ERASE AND PROGRAM button.
- 12) Now turn the S power ON. DO NOT REMOVE POWER TO UNIT UNTIL APPLICATION IS COMPLETE. A status window will display a progress bar. When finished, the message "APPLICATION STARTED" will display.
