

Hemisphere GPS® is pleased to announce the release of Outback S3™ software v2.14.4.15, which allows S3 users to configure Outback AutoMate™ from the S3 as well as view section status from the Map screen in the S3. Additional information can be found in the Outback S3 AutoMate Addendum.

Note: This software update is not compatible with the Outback eDriveX™.

AutoMate must have v1.11 software loaded in order to take advantage of these new features. Refer to the AutoMate v1.11 Upgrade Instructions for more information.

This document is a supplement to the Outback S3 User Guide (part number 875-0196-00) and the Outback AutoMate User Guide (part number 875-0190-000).

All software and documentation mentioned in this document are available at **Support > Download Center** at <http://www.outbackguidance.com>.

Updating S3 Software to Version 2.14.4.15

A USB thumb drive is required to perform this installation.

To update S3 software to v2.14.4.15:

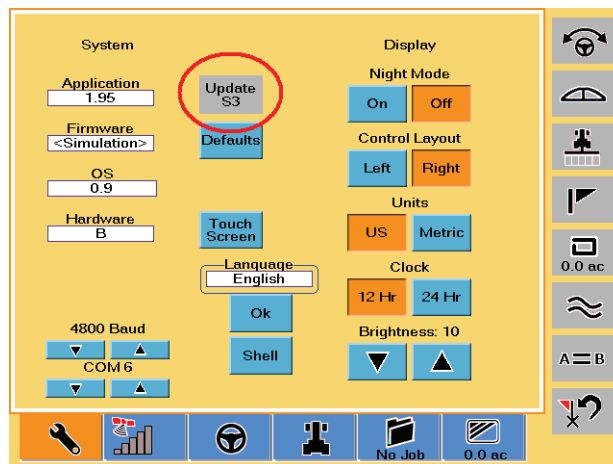

1. Go to www.outbackguidance.com and navigate to **Support>Download Center**.
2. Download and unzip the “s3update 2.14.4.15” folder to your PC.
3. Copy the “s3update 2.14.4.15” folder onto a USB thumb drive. Ensure that the folder is named “s3update”.
4. Power up the S3 and insert the USB thumb drive into the S3.

Note: If the S3 recognizes an available S3 update on the USB drive, the Update S3 button on the System screen will turn blue (indicating it is active).

5. On the System screen press the **Update S3** button and wait for the update to complete.

Note: You may need to manually reboot the S3 if it does not automatically reboot after the update.

6. After the reboot verify the Application version on the System screen has changed to 2.14.4.15.
